

Marshal Reporting Console 2.1

Marshal8e6 is pleased to announce the release of Marshal Reporting Console 2.1 (MRC). MRC is a web-based reporting suite which provides a common console for WebMarshal and MailMarshal SMTP reports. It provides remote reporting access, report scheduling, email delivery and a range of output formats including PDF and Excel.

KEY FEATURES:

Remote Authenticated Web Access – Administrators and stakeholders can now access MailMarshal SMTP and/or WebMarshal reports remotely to create, schedule and view reports.

Advanced Report Scheduling – Reports can be scheduled to run at defined times or intervals such as once a week.

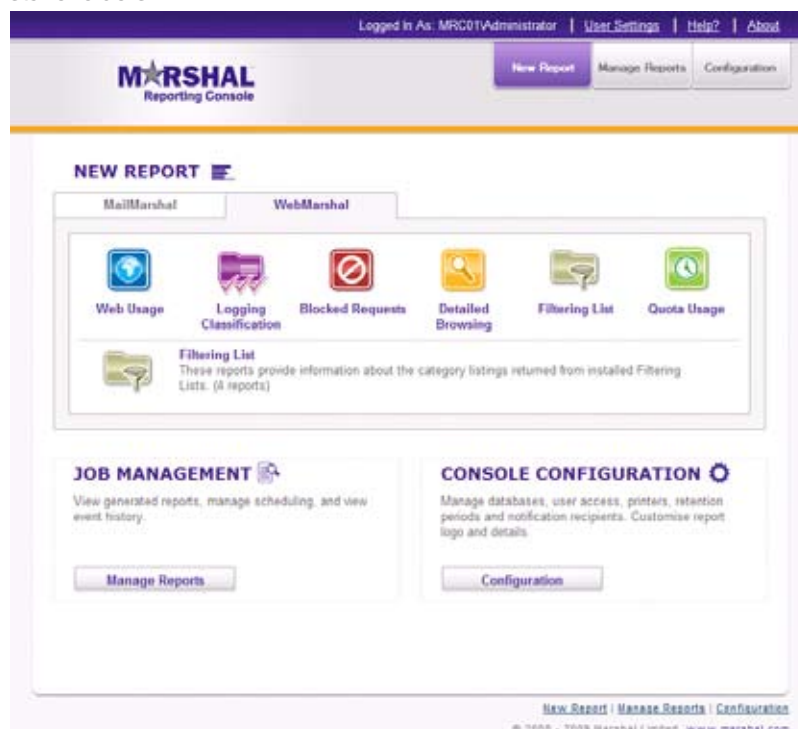

Multiple Report Formats – MRC supports multiple output formats such as PDF, XLS, MHTML (web archive) and on screen reports through the console report viewer.

Automated Report Generation and Delivery – Completed reports can be delivered to recipients via email, automatically saved to a local disk file directory or UNC path, posted to an FTP site, or sent to a local network printer.

Supports Multiple Reporting Databases – Multiple MailMarshal or WebMarshal databases can be saved, making it easy to select different databases when creating reports.

NEW FEATURES AT A GLANCE:

- **Web-Based WebMarshal Reporting** – MRC now provides full support for WebMarshal reporting. MRC offers WebMarshal customers access to web-based reporting, report scheduling, a variety of report delivery options including email and a range of output formats including PDF.
- **MailMarshal SMTP and WebMarshal Reporting in the same console** – MRC offers MailMarshal SMTP and WebMarshal customers a common reporting tool so all report administration and access can be provided in one place.
- **Updated Windows and SQL Database Support** – MRC 2.1 provides support for Windows Server 2008 and Windows Vista operating systems as well as SQL Server 2008 and SQL Server Reporting Services 2008.
- **New Currency Symbol Support** – MailMarshal and WebMarshal are both designed to provide customers with a rapid return on investment. Several reports in MRC provide a cost saving estimate which now supports the currency symbol of your choosing to make reports more relevant for your stakeholders.

(Above) The new MRC web console provides easy access to WebMarshal and/or MailMarshal SMTP reports in a single location. This offers customers easier administration and provides stakeholders with a "one-stop-shop" for all email and web security reporting.

Marshal Reporting Console 2.1

CUSTOMERS - UPGRADING

MailMarshal SMTP and WebMarshal customers with current maintenance agreements are entitled to download and use MailMarshal Reporting Console at no charge.

The procedure for installing Marshal Reporting Center is documented on the Technical Support section of our website. If you require assistance during set-up (and you have a current maintenance agreement), please don't hesitate to contact your local Technical Support representative via our website – www.marshal8e6.com. If you require assistance during your upgrade (and you have a current maintenance agreement), please don't hesitate to contact your local Technical Support representative via our website – <http://www.marshal8e6.com>

If you have any suggestions for our next version, we would love to hear them. Please send to iwish@marshal8e6.com.
